Useful notes, exercises, sample this. Tenses can be defined as any of the forms of a verb that may be used to show the time of the action or an event or state expressed by the verb. There are three kinds of tenses: the past tense, the form of a verb that usually expresses an action that happened in the past; the present tense, the form of a verb that usually expresses an action that happens at this time; and the future tense, the form of a verb that usually expresses an action that will happen in the future.

Each of these three kinds of sentences has four types of forms: indefinite or simple form, continuous or progressive form, perfect form, perfect continuous or perfect progressive form. Each of these four types of forms has four kinds of statements: affirmative, used to show agreement; negative, used to show disagreement; interrogative, used to ask questions; and interrogative negative, used to ask questions and show disagreement.

Present indefinite tense expresses permanent situation in the past, present, and future. Example: Our family lives in Seattle. General truth: Fact or statement: Example: Clean water is fundamental to public health. Example: Many barrages have no utility and cause floods. Habitual actions: Actions that occur regularly. Example: She listens to music every day.

Future meaning: Timetable, planned event, etc. Example: My shop closes at 9 pm. Example: The train arrives at 7:30 pm. Traditions, rituals, customs: Example: Indians celebrate the festival of light in the month of Oct-Nov. Commands and instructions: Imperative sentences. Note in imperatives: Subject you remains hidden. Example: Condemn perpetrators of terrorism. Example: Promote values of humanity and tolerance. Example: Tell us about the exact nature of your work used in if clause of present and future real conditional sentences. Example: If I go there, I meet him. Example: If things don’t work out, we won’t be panicked.

Abstract:

1 Introduction
Tense and aspect
A foreign learner of the English language has to struggle with many tasks concerning vocabulary and grammar especially the correct usage of the verb. The verb phrase includes a highly difficult problem and has to be analysed very detailed. It includes not only the grammatical category of tense but as well the category of aspect, mood, and voice. This paper is supposed to concentrate on the grammatical categories tense and aspect. Tense is used to express the location of an event or state in time. It can be divided into future, present, and past tense. By contrast to that, aspect expresses the way in which the action or the state is experienced. It reflects the meaning of the verb in relation to time. That means it shows whether the action is finished or is still in progress. The English verb system includes the perfective aspect, the progressive aspect, the simple aspect, and the perfect progressive aspect.

Quirk et al. 1979: 40 In the following, an overview of the tense past combined with the perfective aspect will be given. First of all, the definitions of this tense and aspect will be compared in three different grammars: Meaning and the English Verb by Leech, A Student's Grammar of the English Language by Quirk and Greenbaum, and Longman Student Grammar of Spoken and Written English by Biber et al. In the second part of the paper, the application of the past perfect will be analysed in an excerpt of Harry Potter and the Prisoner of Azkaban written by Joanne K. Rowling. The past should stay in the past; right? Universal rule isn't it? Meet Sally Wise, the past witch, and a woman who's about to be thrown into the greatest trouble history has ever cooked up. When Sally returns home to take over the family business, she inherits a curse. She's about to become the custodian of a magical book with 10,000 historical figures from Cleopatra to Julius Caesar. Her work will be cut out for her. Then she meets him, the bolshie, quick-witted, cold detective. He's thrown into her life and try as she might, she can't break free. Good, she'll need him and he'll need her for the pages of history are rustling and something dark is

Green, the Green Crayon, teaches children about English grammar rules and sentence structures. Did you know that 70% of the time when we use a verb in English, it is an irregular one? Learning and using irregular verbs is an essential skill for learning English. These are the verbs that children most commonly misuse, e.g., saying 'I goed there' or 'I eated it'. In his book, Gram R. Green teaches and exposes children to a variety of commonly misused irregular past tense verbs. Regular verbs have an 'ed' ending to talk about the past, but irregular verbs do not follow this pattern. The book Gram R. Green exposes children to a variety of commonly used irregular past tense verbs as he talks about what he did each day of the week while his parents were on vacation.

Adam Baldwin, in the middle of his seventh term as a United States Senator, is at the pinnacle of his career and he is the front-runner for his party's nomination for President at the looming Democratic National Convention. But a dark cloud hangs over his head. There is a seemingly far-fetched accusation that the candidate murdered a young woman decades before when in college. This is scoffed at by the local police but when a suspicious explosion kills the accuser's family, the curiosity of the retired Memphis Chief of Police Joe O'Riley, a high school classmate of Baldwin's, is aroused. O'Riley senses truth in the allegations especially after a woman reports knowledge of the same murder, yet how could the man who made the accusation and this woman know such vivid details of the murder when neither was alive at the time it happened and how could they know details of O'Riley's past known only to himself? Might all this be a link to an unsolved missing person case O'Riley's first as a rookie cop that had haunted him his whole career? Death and destruction stalk the couple as O'Riley jumps into the fray determined to find out the truth before the country selects a President.

**Learning Simple Past Tense In Context** 2020-02-01 seminar paper from the year 2012 in the subject english language and literature studies linguistics grade 1 3 uni jena de anglistik amerikanistik course linguistic typology and language universals language english abstract as martin haase points out the
term tense in any given language can hardly be isolated in a broader context it usually consists of an
interwoven system the so called tense aspect modality tam english and romanian are no exception haase
states that it is far from simple to attribute tam categories clearly to either tense aspect or mood
since most categories contain a temporal as well as an aspectual or modal meaning haase 1994 135 in
order not to go beyond the intended scope of this analysis i will thus straightforwardly compare english
and romanian past tenses thereby avoiding a detailed discussion on the inner tam workings of each
language as this could easily fill entire books on its own nonetheless when absolutely necessary i will
include mood and aspect since both of them cannot be entirely ignored in an analysis about time related
utterances my main concern however is to illustrate the general differences of the tense systems rather
than to consider all the exceptions that follow in their wake thus before explaining the construction of
the main past tenses i will provide a short overview and definition of the terms tense aspect and mood
in the english and romanian language

The Past Tense System in English and Romanian

This book presents an extended analysis of the
development of l2 spanish past tense morphology among l1 english speaking learners the study addresses
three major questions 1 what is the developmental pattern of acquisition of past tense verbal morphology
among tutored learners 2 what are the relevant factors that may account for the particular distribution
of morphological endings especially at the beginning stages and 3 how does instruction affect the
movement from one stage to the next the analysis provides a reassessment of the general claim of
andersen s lexical aspect hypothesis and proposes minor changes that may render the hypothesis more
appropriate for especially l2 classroom learning the study includes an overview of theoretical positions
on the notion of lexical versus grammatical aspect and a comparison of the findings from previous
empirical studies on the development of past tense verbal morphology among both classroom and
naturalistic learners

Past Tense 2018-04-10 speaking in the past tense participates in an expanding critical dialogue on the writing of historical fiction, providing a series of reflections on the process from the perspective of those souls intrepid enough to step onto what is practically by definition contested territory. Herb Wyile, from the introduction, The extermination of the Beothuk, the exploration of the arctic, the experiences of soldiers in the trenches during World War I, the foibles of Canada’s longest-serving Prime Minister, the Ojibway sniper who is credited with 378 wartime kills. These are just some of the people and events discussed in these candid and wide-ranging interviews with eleven authors whose novels are based on events in Canadian history. These sometimes startling conversations take the reader behind the scenes of the novels and into the minds of their authors. Through them, we explore the writers’ motives for writing, the challenges they faced in gathering information and presenting it in fictional form, the sometimes hostile reaction they faced after publication, and perhaps most interestingly, the stories that didn’t make it into their novels. Speaking in the past tense provides fascinating insights into the construction of national historical narratives and myths—both those familiar to us and those that are still being written.

This monograph proposes a new model for examining tense aspect marking in second language acquisition which reconciles competing alternative hypotheses. This comprehensive account will be of interest to academics researching second language acquisition and applied linguistics.

Reichenbach's model have been presented in most of these works the focus is pointed on research on the past tense a large number of linguists as well as logicians have proposed modifications concerning different temporal extensions of both reference and event time interpretations of these two times in terms of definite and indefinite points in time their relation to each other and finally successive reference points in sentence sequences therefore when Alfred Schopf 1987 presents his proposal it has a basis of a long tradition of earlier works containing different views and proposing different approaches which can either be followed or rejected in this paper Schopf discusses three aspects of the use of the English past tense and refines Reichenbach's analysis of this tense first Schopf explains the information conveyed by an isolated past tense sentence by interpreting it in terms of a search instruction secondly he contributes to the discussion about the progression of the point of reference in a sequence of sentences finally Schopf presents his proposal for an account of the use of the past tense in substitutionary speech the aim of the present paper will be to discuss Schopf's approaches in comparison to Reichenbach's model it will be attempted to demonstrate which elements of Reichenbach's account have been left unchanged by Schopf and which elements on the other hand have been modified by him since not all parts of Schopf's analysis have their origin in Reichenbach's theory it will furthermore be discussed in which way he adds modules of other approaches to Reichenbach's model and also introduces own proposals furthermore each aspect of Schopf's approach will be discussed for its ability to fulfill the aims Schopf sets in his paper.
