Health Care Budgeting 1979

The health services in South Africa have undergone a major reorientation in an attempt to provide the poorest and most vulnerable segments of society with increased access to affordable quality health care. Unfortunately, the new policies and health plans have not translated into a commensurate improvement of actual health service delivery and health status. A key missing element has been the lack of an appropriate financial planning and budgeting system. This book, Transformation in Action, attempts to fill the void that exists between planning, budgeting, and implementation in the public health sector. Drawing on local and international research and policy experiments, it outlines an alternative system called the Performance Budgeting System (PBS). Unlike the current budgeting system, the PBS system integrates financial planning and management with strategic operational performance and quality management objectives to ensure that within budget constraints service delivery outputs have the greatest possible impact on health outcomes. In so doing, this system can contribute substantially to achieving the objectives of recent public sector reform initiatives and the ideals of the constitution.

It can also apply to services that are for an older or disabled person who might require assistance with daily activities such as cooking, bathing, running errands, shopping, and more. Do you have a caring compassionate heart? Do you want to start a business where you know you will be assisting people when they need it most? Do you want to be your own boss and run an agency of skilled professionals who you trust to do the hands-on work? In this home healthcare business startup on a budget book, I will outline the different levels of care that your agency might provide according to the need you see in your community.
