the jacobin novel was labeled as such in britain because of its supposed connections to the french
revolution this book takes an in depth look at these novels written between 1790 and 1805 she
centers on the group surrounding wollstonecraft and godwin although not exclusively exploring the
limits of their philosophy of human rights and personal subjectivity unlike other recent scholars the
author treats both male and female writers making feminism an aspect of the work but not the
overriding one while the novels are the main focus other work by the writers is considered as it
pertains to their beliefs she also discusses the reaction from those who defined the jacobins by
opposing them

described as ground breaking in kent mcneil s foreword this book develops an alternative approach
to conventional aboriginal title doctrine it explains that aboriginal customary law can be a source of
common law title to land in former british colonies whether they were acquired by settlement or by
conquest or cession from another colonising power the doctrine of common law aboriginal
customary title provides a coherent approach to the source content proof and protection of
aboriginal land rights which overcomes problems arising from the law as currently understood and
leads to more just results the doctrine s applicability in australia canada and south africa is
specifically demonstrated while the jurisprudential underpinnings for the doctrine are consistent with
fundamental common law principles the author explains that the australian high court s decision in
mabo provides a broader basis for the doctrine a broader basis which is consistent with a re
evaluation of case law from former british colonies in africa as well as from the united states new
zealand and canada in this context the book proffers a reconceptualisation of the crown s title to
land in former colonies and a reassessment of conventional doctrines including the doctrine of
tenure and the doctrine of continuity with rare exceptions the existing literature does not probe as
deeply or question fundamental assumptions as thoroughly as dr secher does in her research she
goes to the root of the conceptual problems around the legal nature of indigenous land rights and
their vulnerability to extinguishment in the former colonial empire of the crown this book is a
formidable contribution that i expect will be influential in shifting legal thinking on indigenous land
rights in progressive new directions from the foreword by professor kent mcneil to read the foreword

worldwide more parents are opting for immersion pre-schooling for their children in order to benefit from its linguistic educational and cultural benefits. This immersion can be either bilingual or monolingual, aimed at early second language learning or at language maintenance, offering minority language children mother tongue support and enrichment. This book examines some of the key issues and policy concerns relating to immersion education in the early years. The term itself can be difficult in some political contexts, as can the differing outcomes noted by studies comparing monolingual programmes and bilingual programmes for minority language children. The importance of training in immersion methodology for educators is discussed, as is the need to adapt preschool pedagogical practices to the immersion context in order to provide optimal input for young language learners. One of the most pressing discussions surrounds differentiated provision ensuring that the varying needs of children with language impairment, typical second language learners, and mother-tongue speakers with significant socioeconomic or linguistic disadvantages are all met. Overall, the book explores the challenges currently facing the sector, particularly with regard to training and professional development for practitioners and the provision of appropriate materials in less widely used languages. Given the documented benefit of high quality immersion pre-schooling, this book fulfills an urgent need to increase the recognition of the sector. This book was published as a special issue of International Journal of Bilingual Education and Bilingualism.
