diversify
mainstream forms of assessment currently used in higher education in order to re-establish the focus on the learning process. Making assessment central to student learning is about returning to what current research emphasises: the primary beneficiary of assessment should be the student. To achieve this, in the assessment context, students and tutors must engage in a process of dialogue and feedback. It seems to be widely accepted that assessment succeeds when the learner monitors, identifies, and then is able to bridge the gap between current learning achievements and agreed goals. It is, however, more questionable whether adequate opportunities are given to students to be active participants in closing what has been termed the loop. Contributors to this book have responded in different ways to the challenge of enhancing learning through assessment, offering reasons for the lack of focus on learning within assessment processes as well as suggesting possible solutions. The chapters demonstrate a balance between innovation and practicality, drawing on the underpinning theories. The result is both rich in discussion and an extremely useful resource for practitioners. This book was originally published as a special issue of Assessment Evaluation in Higher Education. 1 The book English Language Pedagogy prepares for teaching examination for paper I and II. 2 Guide is prepared on the basis of syllabus prescribed in CTET other state TETs related examination. 3 Divided in 3 main sections: grammar, unseen prose, and poem, and pedagogy, giving chapterwise coverage to the syllabus. 4 Previous years solved papers and 5 practice sets are designed exactly on the latest pattern of the examination. 5 More than 1500 MCQs for thorough practice. 6 Useful for CTET UPTET HTET UTET CGTET and all other state TETs. 7 Robert Stenberg once said there is no recipe to be a great teacher; that's what is unique about them.
