The National Union Catalogs, 1963-
1964

The legends of Robin Hood are very familiar but scholarship and criticism dealing with the long and varied tradition of the famous outlaw is as elusive as the identity of Robin himself and is scattered in a wide range of sources many difficult of access. This book is the first to bring together major studies of aspects of the tradition. The thirty one studies take a variety of approaches from archival exploration in quest of a real Robin Hood to a political angle seeking the social meaning of the texts across time to literary scholars concerned with origin structures and generic variation or moral and social significance. Also included are considerations of theatre and film studies and folklore and children’s literature. Overall the collection provides a valuable basis for further study. Stephen Knight is professor of English Literature at the University of Wales Cardiff. He is well known as an authority on the Robin Hood tradition and has edited the recently discovered Robin Hood Forresters Manuscript.
