Wood adhesives are of tremendous industrial importance as more than two thirds of wood products in the world today are completely or partially bonded together using a variety of adhesives. Adhesive bonding offers many advantages over other joining methods for wood components and there has been a great deal of R&D activity in devising new wood adhesives or improving the existing ones. The modern mantra in all industrial sectors is think green, go green which has attracted much attention in the wood adhesive industry. Therefore there is also a lot of research activity in synthesizing environmentally benign and human friendly wood adhesives. This book is divided into four parts: part 1 fundamental adhesion aspects in wood bonding, part 2 synthetic adhesives, part 3 environment friendly adhesives, and part 4 wood welding and general paper. It addresses many different types of wood adhesives as well as bonding, welding of wood components without adhesives. A more recent development, the information contained in this book is valuable for individuals engaged in all aspects of wood adhesion and adhesives, and hopefully will inspire new ideas in wood adhesives - a topic of vital industrial importance.
