prevention interventions in adulthood specifically unemployment and depression this report reviews the rationale for primary prevention of hypertension strategies for prevention of hypertension and efficacy of interventions to prevent hypertension includes policy recommendations this book examines the current state of evidence relating to the effectiveness of primary prevention measures the identification of environmental and lifestyle factors as causes of cancer means that the theoretical basis for the prevention of cancer is well established despite this there have been relatively few studies which examine the effectiveness of different strategies in reducing cancer causing exposures and even fewer where the results in terms of cancers avoided can be assessed most such evidence derives from observational studies which show that changes in cancer incidence occur when diet or tobacco use are modified even in modification is not the result of an organized preventive action the occupational field too provides good examples of reduction in exposure to carcinogens if not always because of their carcinogenic hazard and consequent reductions in cancer incidence this volume provides an in depth study of four intervention studies examining their outcome in terms of cancer risk it also reviews the results of several other previously published studies and provides a convenient summary of results as well as information on future prospects mental disorders cost the united states over 72 billion for treatment related support and lost productivity each year yet prevention of atherosclerotic cardiovascular disease it provides an overview of current evidence regarding approaches to risk assessment traditional and emerging risk factors and atherosclerosis imaging for refinement of risk estimation the volume seeks to provide an essential resource for professionals in the field to assess their patients for risk of cardiovascular disease the book is divided into five sections starting off with an overview of current best practices to risk assessment in primary prevention around the world the second section discusses traditional risk factors such as hypercholesterolemia hypertension diabetes smoking and obesity the third section reviews the newly introduced concept of risk enhancers the fourth section offers insight on novel risk factors with in depth discussion regarding lipoprotein a high sensitivity crp apolipoprotein b social determinants of health stress and cardiovascular disease and polygenic risk scores the final section covers the use of non invasive atherosclerosis imaging computed tomography and ultrasound based techniques as a tool to refine risk estimates throughout the book readers will find multiple tables figures and illustrations that complement the text up to date evidence based and clinically oriented cardiovascular risk assessment in primary prevention is a must have resource for physicians residents fellows and medical students in cardiology endocrinology primary care and health promotion and disease prevention this book describes a number of simple and effective measures for the primary prevention of selected mental neurological and psychosocial disorders addressed to policy makers as well as mental health professionals the book aims both to increase awareness of the potential of primary prevention and to encourage the use of specific interventions with these goals in mind the book restricts its recommendations to measures whose effectiveness has been firmly documented in the scientific and clinical literature four disorders are covered mental retardation epilepsy suicide and burnout of health care staff these were selected for inclusion on the basis of their relative frequency as well as the strength of evidence that primary prevention is both feasible and effective the book adopts a public health approach arguing that the multifactorial etiology of most mental and neurological disorders requires broad based strategies involving many different sectors recommended lines of action range from simple procedures for lowering body temperature in feverish children through strategies involving genetic counseling and screening during pregnancy to measures at the legislative level including enforced iodization of salt to prevent cretinism and gun control or domestic gas detoxification as proven methods of suicide prevention the book has five chapters the first outlines the principles of primary prevention as these apply to mental neurological and psychosocial disorders and summarizes the evidence supporting the effectiveness and feasibility of strategies for primary prevention chapter two on mental retardation provides a guide to measures for the primary prevention of iodine deficiency down syndrome fetal alcohol syndrome and phenylketonuria each disorders is discussed according to a common format that includes information on the size of the problem risk factors and causes and measures available for primary prevention the remaining chapters provide similarly detailed advice on measures for the primary prevention of epilepsy suicide and burnout of professional and family caregivers in fulfilling the promise of children’s services david blumenkrantz shares the expertise he has gained helping communities across the county to implement his successful primary prevention strategy the rite of passage experience drawing on nearly twenty years of experience in human services the author reveals why youth service groups have largely been unable to meet their objectives and he examines what these groups must do to implement and sustain effective prevention efforts offering numerous examples drawn from actual practice blumenkrantz reveals the essential factors in a comprehensive primary prevention strategy for example fostering collaboration between school community and families having a committed core group responsible for implementation and obtaining the financial commitment of schools and the community stressing the need for communities to develop long term prevention strategies he examines how quick fix programs such as the just say no campaign do little to alleviate problems and can actually hinder proven prevention efforts recent studies have shown that the incidence of malignant melanoma continue to increase steadily fortunately through primary and secondary prevention programs the mortality rate from such cases has grown less rapidly compared to 20 years ago many countries are at the present time investing time and energy in campaigns aimed at encouraging sensible sun exposure primary prevention and promoting early visual identification of melanoma secondary prevention this publication brings together leading experts in the fields of epidemiology dermatology and psychology to discuss the current state of international research concerning these prevention programs it has been specially written to alert dermatologists surgeons public health physicians and primary care doctors to the current activities in public health education aimed at preventing deaths from melanoma pediatricians in particular will find this book a valuable addition to their libraries because of the importance of informing families with young children about the dangers of sun exposure at an early Youth it is therefore essential that schools make every effort to prevent behavioural and psychological problems of students and promote their psychological well-being. This volume draws together educators and mental health professionals to present examples of theory-based prevention programmes, programmes which have proved highly successful. Primary prevention and promotion in the schools is drawn from the 1987 Vermont conference on the primary prevention of psychopathology. The aims of child rights education are to make children and their primary duty bearers aware of child rights so that they both can be empowered to together advocate for and apply them at their family school and community levels. This sourcebook focuses on child rights education for primary prevention with reference to participation and development. The introductory chapter covers child rights values of peace, dignity, tolerance, freedom, equality, and justice and child rights principles of dignity of the child, primary consideration to the best interests of the child, universality, and non-discrimination. Child rights to participation focuses on child rights for playing a decisive and responsible role in their own life and a participatory role in the family, schools, associations, community and with the state as citizens. Child rights to development includes child rights to free, compulsory, comprehensive, and quality education free of discrimination and violence. Child rights to play, recreational, cultural, and artistic activities and media literacy. Child rights to health with reference to physical health and hygiene, healthy and hygienic food and nutrition, sexual health, and prevention of substance abuse and child rights to environmental education with reference to child rights to environmental harmony and hygiene. Child rights to sustainable environment is a must-read for researchers, trainers, and other professionals working on child rights issues across the world and especially in developing countries. Schools reflect one of the greatest investments of any society's resources. Investments of finances, talented personnel, and commitment of time and energy by youth it is therefore essential that schools make every effort to prevent behavioural and psychological problems of students and promote their psychological well-being. This volume draws together educators and mental health professionals to present examples of theory-based prevention programmes, programmes which have proved highly successful. Primary prevention and promotion in the schools is drawn from the 1987 Vermont conference on the primary prevention of psychopathology. The ultimate objective of all aetiological research is the primary prevention of rheumatic diseases. This book emphasizes what can be done in the prevention for example of rheumatic symptoms arising out of occupational overuse injuries and infections of joints. It also provides advice on pain tolerance and control.
