Socially adept teaching social skills to children with ADHD, LD and Aspergers is a definitive guide to understanding and meeting the needs of those who have difficulty with social skills. Written in a clear and accessible manner, this book provides a theoretical framework to the teaching of social skills alongside a range of practical ideas for practitioners. The book offers a four-step plan that can be adapted for use with young people or adults. It includes discussion of how to teach social skills so that social skills develop through childhood; why they sometimes might not; and why social skills difficulties can have an impact on self-esteem and friendships.

The book includes a breakdown of social skills into the following areas: body language, eye contact, listening, and paralanguage starting and ending conversations, maintaining conversations, assertiveness. Written by one of the most well-known speech and language therapists in this field, and the creator of the internationally successful Talkabout resources, this book provides a key reference for the study of social skills. It will be essential reading for educators, therapists, parents, and anyone supporting others in developing communication and social skills.

The book includes over 80 reproducible mini books for children to assemble, color, read, and make their own. Each mini book focuses on a different aspect of important skills, including cooperative play, learning about feelings, communication, school day behavior, manners, and behavior management. Mastery of these essential social skills can be a factor in determining a child's future success. Social acceptance and happiness features developmental tasks for communication, emotions, manners, relationships, and daily living skills. Multisensory activities shape behavior through auditory, visual, and tactile senses.

Originally published in 1984, one of the few facts that emerged clearly in the beleaguered field of psychology and mental health at the time was the extent of poor social skills in psychiatric patients, the mentally handicapped, and problem adolescents. As a result, during the 1970s, social skills training espoused as a form of behavior therapy seemed to offer great promise. Based on the notion that social skills like any other skills are learnt and can be taught, if lacking, however in evaluating social skills training, many investigators found that skills did not endure and generalize. This book attempts a major reassessment of social skills training. It examines the underlying paradigms which are shown to be fundamentally behaviourist. Such paradigms are argued to severely constrain the aims and method of current types of training. The book develops what is termed an agency approach based on the notion that, as an active social agent who actively constructs his own experiences and generates his own...

**Social Skills Matter!**, Grades PK - 2 2014-01-15

Originally published in 1984, one of the few facts that emerged clearly in the beleaguered field of psychology and mental health at the time was the extent of poor social skills in psychiatric patients, the mentally handicapped, and problem adolescents. As a result during the 1970s, social skills training espoused as a form of behavior therapy seemed to offer great promise based on the notion that social skills like any other skills are learnt and can be taught. However, in evaluating social skills training, many investigators found that skills did not endure and generalise. This book attempts a major reassessment of social skills training. It examines the underlying paradigms, which are shown to be fundamentally behaviourist. Such paradigms, it is argued, severely constrain the aims and method of current types of training. The book develops what is termed an agency approach, based on man as a social agent who actively constructs his own experiences and generates his own goal-directed behaviour. On the basis of those constructs, this new model is developed in both theoretical and practical ways in the main body of the book. It would be of great interest to all those involved with social skills training.
