In the years after World War I, the defeated and much-reduced German army developed new clothing and personal equipment that drew upon the lessons learned in the trenches in place of the wide variety of uniforms and insignia that had been worn by the Imperial German army. A standardized approach was followed, culminating in the uniform items introduced in the 1930s as the Nazi party came to shape every aspect of German national life. The outbreak of war in 1939 prompted further adaptations and simplifications of uniforms and insignia. While the increasing use of camouflage items and the accelerated pace of weapons development led to the appearance of new clothing and personal equipment, medals and awards increased in number as the war went on, with grades being added for existing awards and new decorations introduced to reflect battlefield feats. Specialists such as mountain troops, tank crews, and combat engineers were issued distinctive uniform items and kit.
