Shadow of the mountain a novel of the flood (2023)

in a near future half flooded world governed by technobureaucracy and ultraconformity where human contact is abhorrent and passion unheard of william fowke already has a reputation as a trouble maker and now he insists that the wall the engineering marvel that keeps what remains of america s east coast from being inundated by the atlantic ocean is leaking convicted of sedition and excluded fowke begins a horrific thrilling odyssey through a nether world of gulags with the exception of agent julia keller who arrested him everyone is hostile including his former bosses and fellow prisoners leaving fowke excluded even by the excluded and desperate to get back to his threatened wall to sound the alarm mario brelich a hungarian author writing in italian was a superb ironist in his three novels of which this is the first he explored central episodes of the old and new testaments with unsparing wit and intelligence in navigator of the flood brelich s noah is a man laboring under a burden of responsibility by a lord who appears from time to time to correct at man s expense his own foreknowledge and omniscience if noah finds god s commands at times cruel or incomprehensible if he still sees beauty in a life now under threat of extinction and wonders why he and his family should be chosen to survive while all others are condemned to perish he remains the dutiful and upright patriarch who submits to the role assigned to him a richly nuanced cultural history of the great mississippi flood the great mississippi flood of 1927 was the most destructive river flood in u s history drowning crops and displacing more than half a million people across seven states it was also the first environmental disaster to be experienced virtually on a mass scale the flood year 1927 draws from newspapers radio broadcasts political cartoons vaudeville blues songs poetry and fiction to show how this event provoked an intense and lasting cultural response americans at first
seemed united in what Herbert Hoover called a great relief machine but
deep rifts soon arose southerners pointing to faulty federal levee design
decreed the attack of yankee water the condition of african american
evacuees prompted comparisons to slavery from pundits like W. E. B. Du
Bois and Ida B. Wells and environmentalists like Gifford Pinchot called the
flood the most colossal blunder in civilized history Susan Scott Parrish
examines how these and other key figures from entertainers Will Rogers
Miller Lyles and Bessie Smith to authors William Faulkner and Richard
Wright shaped public awareness and collective memory of the event the crises of this period that usually dominate historical
accounts are war and financial collapse but the flood year 1927 allows us
to assess how mediated environmental disasters became central to
modern consciousness gorgeously creepy and strangely human national
public radio it started on Christmas Day in 1994 dark water suddenly rose
from the land invading our homes and lives they say it came from the
depths inside the loop whatever it was the flood changed everything
nothing would ever be the same again Simon Stalenhag takes us to an
extraordinary world a world of fear and discovery in a story told through
his gut punchingly spare narrative and lush illustrations stories told in
both words and haunting illustrations things from the flood captures a
not too distant reality that is both haunting and imminent addressing the
many ways developing technology and nature can create havoc and
wonder in our world and the hope we might still find in that future
perfect for fans of everything from Stranger Things to Jurassic Park to
Jumanji things from the flood is an incredible unmissable work of genius
praise for Simon Stalenhag tales has the magic it s got the robots the
weirdness the dinosaurs but most of all it has the wonder no one who
picks this book up will be the same person when they put it down again
NPR on tales from the loop no words to describe this novel in pictures

of the pillar of autumn the indomitable captain jacob keyes staff sergeant
avery johnson the ai cortana hundreds of fearless marines and spartan
117 the master chief having barely escaped the battle for reach the crew
of the pillar of autumn is forced to make a jump into slipspace in hopes
of evading the vast alien alliance hell bent on wiping out humanity but
their destination brings them to an ancient mystery and an even greater
struggle in this far flung corner of the universe floats a magnificently
massive artificial ring world a construct from a long lost race the humans
only hope of survival is to crash land on its surface and take the battle
against the covenant to the ground but they soon discover that this
enigmatic ring world is much more than it seems built 100 000 years ago
by a civilization known as the forerunners this halo is worshipped by the
covenant a sacred artifact that they hope will complete their religious
quest for supposed transcendence they will stop at nothing to control it
engaged in a fierce ground battle master chief and cortana go deep into
the halo construct to uncover a dark secret this enigmatic ring world is
also the universe s most dangerous weapon its purpose the destruction of
all sentient life for the forerunners built the halo to battle the universe s
most vicious enemy a virtually unstoppable and suddenly reawakened

of tiahuanaco in bolivia is one of the greatest archaeological mysteries in
the world the author presents evidence showing that the earth may have
once had a completely different moon in the past along with a calendar
that matched a different rotation of the earth it is difficult to imagine
making claims for human rights without using images for better or worse
images of protest evidence and assertion are the lingua franca of
struggles for justice today and they seem to come in a flood more and
more day and night but through which channels does the torrent pass the
flood of rights examines the pathways through which these images and
ideas circulate routes that do not merely enable but actually shape
human rights claims and their conceptual background what are the
technologies and languages that structure the global distribution of humanism and universalism and how do they leave their mark on these ideas themselves which narratives and imageries have proven easier to export and import and whose interests are at stake in the configurations in question the flood of rights draws on a conference of the same name organized by the luma foundation and center for curatorial studies at bard college which took place in arles france in 2013 copublished with the luma foundation and the center for curatorial studies at bard college new york contributors amanda beech rony brauman david campbell olivia custer rosalyn deutsche thomas keenan eric kluitenberg david levine suhail malik sohrab mohebbi sharon sliwinski hito steyerl bernard stiegler tirdad zolghadr from the perspective of the family s patriarch 70 year old louis roubien zola provides the reader with emotionally charged and detailed descriptions of a large family s desperate struggle against the rising flood waters and of the destruction of their farm from the flood that remade the earth in the old testament to the 1931 china floods that killed almost four million people from the broken levees in new orleans to the almost yearly rising waters of rivers like the mississippi floods have many causes rain melting ice storms tsunamis failures of dams and levees acts of vengeful gods they have been used as deliberate acts of war to cause thousands of casualties flooding kills far more people than any other natural disaster in this cultural and natural history of floods john withington tells stories of the deadliest floods the world has seen while also exploring the role of the deluge in religion mythology literature and art withington describes how aspects of floods the power of nature human drama changed landscapes have fascinated artists novelists and filmmakers he examines the ancient catastrophic flood that appears in many religions and cultures and considers how the symbol of the flood has become a key icon in world literatures and a component of the contemporary disaster movie withington also depicts how humans try to defend themselves against these merciless encroaching waters and discusses the increasing danger floods pose in a future beset by climate change filled with illustrations flood offers a fascinating overview of our relationship with one of humanity s oldest and deadliest foes reprint of the original first

1916 and paint creek in 1932 in the 1980s historian and author j dennis deitz interviewed survivors of the 1932 paint creek flood in the flood and the blood first published in 1988 they share their memories of the dreadful night of july 10 11 1932 when a cloudburst transformed the typically serene paint creek into a deadly wave that killed nearly 30 and left thousands homeless they talk about their fears daring escapes and friends lost forever hitting in the darkest throes of the great depression the flood swept away the few things people had left for the survivors the trauma never went away as betty kate davenport recollected 55 years after that night i don t think anyone who was in the flood ever really got over it just a few miles away from paint creek is cabin creek also made up of coal mining communities by the 1980s few people were still alive who could remember the 1916 cabin creek flood but deitz tracked down a handful that recalled it clearly in that instance almost six inches of rain fell in less than five hours the surging creek killed an estimated 71 making it west virginia s deadliest flood attributable to natural causes the 1972 buffalo creek disaster in which 125 perished in floodwaters was due to a collapsed coal waste dam in addition deitz dedicates chapters to other facets of the region s turbulent history the 1912 13 paint creek cabin creek mine war which was one of the deadliest struggles in u s labor history and historic coal mine disasters close to those streams the book concludes with an account of miner bill derenge s terrifying yet inspirational story of surviving explosions at eccles and layland two of west virginia s deadliest mine disasters the flood and the blood vividly stresses the dangers people living in west virginia s coalfields have faced on a day to day basis deitz skillfully brings these stories together in the words of the people who lived them demonstrating their remarkable resilience in moments of inconceivable crises the stories translated here all of ancient mesopotamia and include not only myths about the creation and stories of the flood but also the longest and greatest literary composition the epic of gilgamesh this is the story of a heroic quest for fame and immortality pursued by a man of great strength who loses a unique opportunity through a moment s weakness so much has been discovered in recent years both by way of new tablets and points of grammar and lexicography that these new translations by stephanie

the mountain state of west virginia has experienced more than its share of devastating floods rugged terrain and severe weather make for a dangerous combination even a brief torrential rain can inundate narrow hollows and turn rippling creeks into raging deluges in minutes this occurred in dramatic fashion southeast of charleston on cabin creek in 1916 and paint creek in 1932 in the 1980s historian and author j dennis deitz interviewed survivors of the 1932 paint creek flood in the flood and the blood first published in 1988 they share their memories of the dreadful night of july 10 11 1932 when a cloudburst transformed the typically serene paint creek into a deadly wave that killed nearly 30 and left thousands homeless they talk about their fears daring escapes and friends lost forever hitting in the darkest throes of the great depression the flood swept away the few things people had left for the survivors the trauma never went away as betty kate davenport recollected 55 years after that night i don t think anyone who was in the flood ever really got over it just a few miles away from paint creek is cabin creek also made up of coal mining communities by the 1980s few people were still alive who could remember the 1916 cabin creek flood but deitz tracked down a handful that recalled it clearly in that instance almost six inches of rain
fell in less than five hours the surging creek killed an estimated 71 making it west virginia s deadliest flood attributable to natural causes the 1972 buffalo creek disaster in which 125 perished in floodwaters was due to a collapsed coal waste dam in addition deitz dedicates chapters to other facets of the region s turbulent history the 1912 13 paint creek cabin creek mine war which was one of the deadliest struggles in u s labor history and historic coal mine disasters close to those streams the book concludes with an account of miner bill derenge s terrifying yet inspirational story of surviving explosions at eccles and layland two of west virginia s deadliest mine disasters the flood and the blood vividly stresses the dangers people living in west virginia s coalfields have faced on a day to day basis deitz skillfully brings these stories together in the words of the people who lived them demonstrating their remarkable resilience in moments of inconceivable crises

previous research on mesopotamian flood traditions tended to focus on a few textual sources how the traditions originated and developed as a whole has not been seriously investigated by systematically examining a large body of relevant cuneiform sources of diverse genres from the early dynastic iii period ca 2600 2350 b c to the end of the first millennium b c this book observes that it is during the old babylonian period ca 2000 1600 and classical attestations of the flood traditions are found on linguistic conceptual and literary historical grounds the book argues that the flood traditions emerged relatively late in sumerian traditions it traces different evolutionary stages of the flood traditions from the emergence of the flood motif within the socio political and cultural contexts of the early isin dynasty ca 2017 1896 b c to the diverse mythological representations of the motif in literary traditions to the historicisation of the motif in chronography and finally to the interactions between various strands of the flood traditions and other mesopotamian literary traditions such as sumerian and babylonian compositions about gilgames by uncovering the processes through which the flood traditions were constructed the book offers a valuable case study on the complex and dynamic relationship between myth making the development of literature the rise of historical consciousness and historiography and socio political circumstances in the ancient world the origins and development of the flood traditions examined in the book furthermore represent one of the best documented examples illustrating the continuities and changes in mesopotamian intellectual linguistic literary socio political and religious history over the course of two and a half millennia

dams are subject to failure and the damages produced by the resulting flood are extensive alleviation or prevention of the damaging effects
requires the knowledge of the flood characteristics these include primarily the time of arrival of the flood wave front the maximum flood level and the time at which the maximum flood level occurs after dam failure using a rational computation technique based on the method of characteristics dimensionless graphs of the aforementioned flood characteristics were prepared for a prismatic channel of general parabolic cross section and several values of the parameters involved these values were selected to cover the practical range of the field conditions affecting the magnitude of the dam break flood results were obtained for such periods of time that the flood peak advanced adequately down stream and either subsided or stabilized considerably
