business is being conducted on definite and scientific principles today and as these
principles are extended more generally the man with technical knowledge will have a
correspondingly greater advantage over the man who has only a foundation of meagre
dimensions a technical training picked up by hard knocks during active service in these
days of competition the railroads are constantly looking for young men with level headed
business judgment and sound horse sense with minds trained to comprehend rapidly and
correctly to concentrate to follow from cause to effect to the young man about to enter the
railroad service let it be known that the object for which any railroad exists is to secure
freight and passenger traffic at remunerative rates and to transport the same with
economy and dispatch to obtain such results it became necessary for the railroad
companies to create traffic operating and accounting departments which are mutually
dependent the station agent is the recognized representative in his local ity of these
departments and is necessarily subject to the instructions of those in charge of securing
handling and accounting for traffic through the agent the business of the railroad
company with its patrons is conducted his position is one of responsibility since in a great
majority of cases as much business is done over his counter as over that of any merchant
in town he is engaged in selling a commodity namely transportation and like all merchants
business methods are necessary to his success whether his station is large or small his
duties arduous or otherwise such methods are equally necessary he can not succeed nor
do the company justice especially in a competitive station unless he is active industrious
and courteous any more than a merchant can succeed who lacks these qualities even if
there be no competition at his station precisely the same qualities are necessary for the
same reasons and because the railroad com pany employing him desires to treat those
who can not buy transportation of any other company precisely as well as it does those
who can for as an idle thriftless or uncivil merchant invites the establishment of a rival
store so the agent may invite a competing railway unless he proves by his work and
methods that the people are as well ofi with one good railway and one good agent as
they would be with more about the publisher forgotten books publishes hundreds of

diagrams this owners edition workshop manual covers the vw transporter type 4 t4 which
was introduced in december 1990 fitted with 2 0 and 2 5 litre petrol engines and 1 9 and 2
4 litre diesel engines it has been specially written for the practical owner who wants to
maintain a vehicle in first class condition and carry out the bulk of his or her own servicing
and repairs comprehensive step by step instructions are provided for service and
overhaul operations to guide the reader through what might otherwise be unfamiliar and
complicated tasks numerous drawings are included to amplify the text with the aid of this
manual many aspects of service overhaul and repair are within the scope of an owner
with a reasonable degree of mechanical aptitude some operations however demand
more skill other jobs require the use of special tools and in some cases testing facilities
and techniques that are not generally available only you can judge whether a job is within
your capabilities we do however try to assist the reader to come to an informed decision
whilst every effort has been made to ensure that the information provided is correct it is
obviously not possible to guarantee complete freedom from errors or omissions
information to be found in the driver s handbook is not necessarily duplicated here and it
is not possible within this volume to cover every aspect to be found in the manufacturer s
own workshop manual which is of much greater size and complexity however it should be
consulted if more detailed information is needed always remember that you are
responsible for your own safety and that of others when working on a vehicle take
particular care with safety related systems like the brakes and steering and seek
