Gender mainstreaming in sport recommendation cm rec20152 and explanatory memorandum (2023)

Sport has traditionally been and still is in many aspects a male domain. The dynamics of gender relations affect the overall participation of women and men in sport and can result in unequal access to sporting activities and to responsibilities within sport. In order to achieve de facto equality between women and men in sport, the structural character of gender inequality must be addressed by adopting a strategy of gender mainstreaming and by involving all the relevant institutions and participants in its implementation. This recommendation encourages member states to review their legislation in order to bring the gender mainstreaming strategy into public sport and physical education policies and programmes. A series of measures is set out in the appendix to guide member states when revising legislation or drawing up national action plans. Disability sport is a relatively recent phenomenon, yet it is also one that particularly in the context of social inclusion is attracting increasing political and academic interest. The purpose of this important new text, the first of its kind, is to introduce the reader to key concepts in disability and disability sport and to examine the complex relationships between modern sport, disability, and other aspects of wider society. Drawing upon original data from interviews, surveys, and policy documents, the book examines how disability sport has developed and is currently organised and explores key themes, issues, and concepts including disability theory and policy, the emergence and development of disability sport, disability sport development in local authorities.

participation of Muslim women in sport. Sport education and social policy: the state of the social sciences of sport is fascinating reading for any researcher or advanced student working in sport studies, physical education, or kinesiology. How will sport keep pace with current scientific and biological advances? Is the possibility of the bionic athlete far away and is this notion as bad as it might first appear? Is our fascination with sport winners fascistoid questions such as these and many others are posed and examined by the contributors to this volume? Some are sceptical of future developments in sport and demand radical reforms to halt progress. Others are more optimistic and propose that sport should adapt to new advances just as other realms of the cultural sphere have to some of the topics examined here such as the genetic engineering of athletes and the significance of the public’s fascination with sport winners are being discussed for the first time whilst others such as sex segregation, nationalism, and doping are being revisited and reintroduced onto the agenda after a period of suggestive silence. This book provides the reader with a deep insight into the moral and ethical value we place on sport in today’s society. Challenging and demanding its contributors urge us to think again about current sports practices and the future of sport as a cultural phenomenon.

Potential of sport is under-exploited at both EU and national level despite its ability to deliver on core policy objectives in the health, education, employment, and social spheres. This report considers how the EU can maximise the potential of sport in its own policy making and delivery and how it can help member states do likewise. It looks at how EU legislation should be applied to sport in order to ensure the sustainability of grassroots sport, particularly its revenue streams from the broadcasting of professional sport. The report’s main recommendations include there is value in a dedicated sport fund, but there is greater potential value in mainstreaming it into other EU funding streams including the structural funds and through ensuring redistribution from professional sport. The EU should include sport in its work on digital
piracy and should look further at whether the gambling industry should be required to pay a fair return to sport different member states are more advanced in certain areas than others for example finland on levels of participation among older people offering potential for the sharing of best practice the commission should create a web portal which allows grassroots organisations to make links with each other the voice of grassroots as well as professional sport need to be heard in brussels dialogue between the commission and sports organisations needs to be made more representative marion keim maintains that through properly organized sport south africans can learn to play together with respect learn to all be on the same team and in the process contribute to the building of a new south africa disability sport is a relatively recent phenomenon yet it is also one that particularly in the context of social inclusion is attracting increasing political and academic interest the purpose of this important new text the first of its kind is to introduce the reader to key concepts in disability and disability sport and to examine the complex relationships between modern sport disability and other aspects of wider society drawing upon original data from interviews surveys and policy documents the book examines how disability sport has developed and is currently organised and explores key themes issues and concepts including disability theory and policy the emergence and development of disability sport disability sport development in local authorities mainstreaming disability sport disability physical education and school sport elite disability sport and the paralympic games disability sport and the media including chapter summaries seminar questions and lists of key websites and further reading throughout sport disability and society provides both an easy to follow introduction and a critical exploration of the key issues surrounding disability sport in the twenty first century this book is an invaluable resource for all students researchers and professionals working in sport studies disability studies physical education sociology and social policy nigel thomas is head of sport

examples and cases from across the world to discuss how sport has and can further contribute to the UN 2030 sustainable development agenda. It discusses the major steps that international bodies have taken so far and can further take in the progressive integration of sport for sustainable development. Contributors from 21 countries take up at least one of the 17 UN sport for development and peace goals and present and analyze examples of national, regional, or local policies using sport as a lever for sustainable development. From traditional games to major competitions, from gender equality to social development and developing governmental transparency, the chapters showcase diverse experiences and demonstrate that sport is today much more than just physical activity. This book is based on the network of the international research network in sport tourism (IRNIST) with the collaboration of Sport 4 Impact. It is the first step of a collaboration between universities and the world of associations working in partnership with organizations such as the UN or the European Union. The book is an important resource not just for students and researchers of sport science but for policy makers, bureaucrats, and sport administrators. This book looks at the potential of sport to contribute to wide-ranging development outcomes which have been recognized across international policy declarations most significantly in the UN 2030 Agenda for sustainable development. It provides a theoretical approach to sport and development. It begins by addressing the basic concepts of sport development and sustainability and then discusses the potential contribution of sport to five prioritized SDGs: SDGs 3 4 5 8 and 16 and the environment as one of the sustainable development pillars that may contribute to SDGs 6 7 11 12 13 14 and 15. This academic resource provides a macro view to students and researchers of sports sciences to know more about the fundamental concepts of sustainable development goals and to enhance their knowledge about sport as a conduit that can help achieve wider development outcomes rather than being an end in itself. This book is of interest to students and researchers.

states are increasingly turning to sport as a foreign policy instrument and they cannot ignore the corresponding influence that global sport has on their core interests. This book is devoted to exploring this relationship in detail, although any examination of sport and foreign policy inevitably focuses on issues related to both politics and international relations. The primary intention here is to consider the dimensions associated with foreign policy. This book was previously published as a special issue of Sport in Society.

What is or what should be the function of sport in a globalized, commercialized world? Why does sport matter in the 21st century? In ethics and governance in sport, the future of sport imagined an ensemble of leading international experts from across the fields of sport management and ethics calls for a new model of sport that goes beyond the traditional view that sport automatically encourages positive physical, psychological, social, moral, and political values. Acknowledging that sport is beset by poor practice, corruption, and harmful behaviors, it explores current issues in sport ethics, governance, and development. Considering how good governance and the positive potentials of sport can be implemented in a globalized sporting landscape, ethics and governance in sport suggests a future model of sport governance based on well substantiated projections and argues that identifying the root causes of harmful behavior those things that are characteristic of sport and engaging sport managers, policy makers, and leaders of sport organizations is essential if sport is to thrive.

The book’s interdisciplinary examination of sport encompassing philosophy, sociology, economics, management, and sport development and its forward-looking approach makes it important reading for advanced students, researchers, and policy makers with an interest in the place and development of modern sport. Its clear messages invite self-reflection and discussion, especially within sports organizations. This volume examines sport’s relationship with the environment in the context of the ongoing climate crisis. Contributors examine how sport is implicated in environmentally
damaging activities how decisions are made about how to respond to environmental issues who benefits most and least from these decisions although there is significant interest in the social role of sport in fostering civil society from both policymakers and academics there is a lack of evidence of the specific role of sport federations in this system this book critically presents the mechanisms and structures in a selection of sport federations within a variety of european countries that illuminate the varied relationships between not for profit sport federations their members governments and the citizens they represent the contributors explore the contrasts and synergies between core social capital theoretical perspectives and how these may be informed by and or shape the realities of governance from different perspectives within the sport system

inclusion is primarily discussed in education with the increasing number of member states of the United Nations ratifying the convention on the rights of persons with disabilities. Academics have vividly discussed inclusion in the context of other areas of life such as the community at large as social inclusion in the context of work and employment and with regard to the aspects addressed by Article 30.5 of the convention namely cultural life, recreation, leisure, and sport. This volume is organized around the topic of inclusion in sport and has a particular focus on the participation of people with disabilities in sport. Typical barriers for people with disabilities to participate in sport include lack of awareness on the part of people without disabilities as to how to involve them in teams adequately, lack of opportunities and programmes for training and competition, too few accessible facilities due to physical barriers and limited information on and access to resources. The chapters attribute central importance to the processes and mechanisms of inclusion that operate within sporting environments and to the question of either what happens or could happen to persons with disabilities who enter the playing field. The chapters were originally published in a special issue of Sport in Society.
