This training of trainers TOT manual aims to provide insights into the operation, maintenance, and basic repair of farm machinery. It provides an overview of the main concepts of equipment that can facilitate sustainable agriculture practices with examples and guidelines on the topic. Its objective is to provide extension officers, technicians, mechanics, and youth with the necessary information and skills to become trainers and deliver technical capacity sessions on this topic. There is a mix of theory and practice in this training. Participants must have the time to individually perform the different tasks described in the modules with close supervision. The training manual comprises four modules: Module 1 covers different tractors as a power source and power takeoff operations; Module 2 focuses on the implements and equipment attached to tractors for field operations; Module 3 is about harvest, post harvest, and storage technologies; Module 4 covers general aspects and tips for maintenance, spare parts, and replacements.

One of the most common complaints parents hear is that their child has great potential but is lazy in the workplace. One hears that a colleague is brilliant but just can’t seem to deliver on time. Dr. Levine believes that in reality, very few people are truly lazy. Nearly all lazy children and unproductive adults are in fact suffering from some sort of output failure that is some problem of the mind that inhibits their productivity despite their good intentions. In this book, Dr. Levine draws heavily on his years of clinical experience to construct the stories of representative children and adults who failed to be productive for the most common reasons. Too often we focus only on failure, but people benefit enormously from recognition of their successes in explaining outside or environmental factors that can affect productivity. Dr. Levine points to the role of parents as well as teachers in identifying a child’s weaknesses and nurturing the capacity to deliver with such practical suggestions as describing the ideal study environment for a child whether the problem is manifested in motor breakdown, memory shortfall, verbal problems, lack of mental energy, or underlying disorganization. Dr. Levine provides a workable solution and dismisses the lazy label.
