Aldo Leopold's Odyssey, Tenth Anniversary Edition 2016-05-24 in 2006 julianne lutz warren née newton asked readers to rediscover one of history s most renowned conservationists aldo leopold s odyssey was hailed by the new york times as a biography of ideas making us feel the loss of what might have followed a sand county almanac by showing us in authoritative detail what led up to it warren s astute narrative quickly became an essential part of the leopold canon introducing new readers to the father of wildlife ecology and offering a fresh perspective to even the most seasoned scholars a decade later as our very concept of wilderness is changing warren frames leopold s work in the context of the anthropocene with a new preface and foreword by bill mckibben the book underscores the ever growing importance of leopold s ideas in an increasingly human dominated landscape drawing on unpublished archives warren traces leopold s quest to define and preserve land health leopold s journey took him from iowa to yale to the southwest to wisconsin with fascinating stops along the way to probe the causes of early land settlement failures contribute to the emerging science of ecology and craft a new vision for land use leopold s life was dedicated to one fundamental dilemma how can people live prosperously on the land and keep it healthy too for anyone compelled by this question the tenth anniversary edition of aldo leopold s odyssey offers insight and inspiration

Aldo Leopold 2010-10-19 this biography of aldo leopold follows him from his childhood as a precocious naturalist to his profoundly influential role in the development of conservation and modern environmentalism in the united states this edition includes a new preface by author curt meine and an appreciation by acclaimed kentucky writer and farmer wendell berry

For the Health of the Land 2012-07-16 aldo leopold s classic work a sand county almanac is widely regarded as one of the most influential conservation books of all time in it leopold sets forth an eloquent plea for the development of a land ethic a belief that humans have a duty to interact with the soils waters plants and animals that collectively comprise the land in ways that ensure their well being and survival for the health of the land a new collection of rare and previously unpublished essays by leopold builds on that vision of ethical land use and develops the concept of land health the practical measures landowners can take to sustain it the writings are vintage leopold clear sensible and provocative sometimes humorous often lyrical and always inspiring joining them together are a wisdom and a passion that transcend the time and place of the author s life the book offers a series of forty short pieces arranged in seasonal almanac form along with longer essays arranged chronologically which show the development of leopold s approach to managing private lands for conservation ends the final essay is a never before published work left in pencil draft at his death which proposes the concept of land health as an
The organizing principle for conservation also featured is an introduction by noted leopold scholars J. Baird Callicott and Eric T. Freyfogle that provides a brief biography of Leopold and places the essays in the context of his life and work and an afterword by conservation biologist Stanley A. Temple that comments on Leopold's ideas from the perspective of modern wildlife management. The book's conservation message and practical ideas are as relevant today as they were when first written over fifty years ago for the health of the land represents a stunning new addition to the literary legacy of Aldo Leopold.

The River of the Mother of God, 1992-12-01. His name is inextricably linked with a single work, A Sand County Almanac, a classic of natural history literature and the conservationist's bible. This book brings together the best of Leopold's essays.

Aldo Leopold, 1987. A collection of nature writings by American conservationist Aldo Leopold based on his experiences and feelings while at his weekend farm along the Wisconsin river illustrated with photographs taken at the farm over the course of a year.

A Sand County Almanac, 2001-11-15. When initially published more than twenty years ago, Thinking Like a Mountain was the first of a handful of efforts to capture the work and thought of America's most significant environmental thinker. Aldo Leopold's new edition of Susan Flader's masterful account of Leopold's philosophical journey includes a new preface reviewing recent Leopold scholarship and makes this classic case study available again and brings much deserved attention to the continuing influence and importance of Leopold today. Thinking Like a Mountain unfolds with Flader's close analysis of Leopold's essay of the same title, which explores issues of predation by studying the interrelationships between deer, wolves, and forests. Flader shows how his approach to wildlife management and species preservation evolved from his experiences restoring the deer population in the southwestern United States. His study of the German system of forest and wildlife management and his efforts to combat the overpopulation of deer in Wisconsin. His own intellectual development parallels the formation of the conservation movement, reflecting his struggle to understand the relationship between the land and its human and animal inhabitants. Drawing from the entire corpus of Leopold's works including published and unpublished writing, correspondence, field notes, and journals, Flader places Leopold in his historical context in addition to a biographical sketch drawn on personal interviews with family, friends, and colleagues to illuminate his many roles as a scientist, philosopher, citizen policy maker, and teacher. Flader's insightful analysis of the issues makes Thinking Like a Mountain a standard source for readers interested in Leopold scholarship and the development of ecology and conservation in the twentieth century.

Thinking Like a Mountain, 1994-08-01. Approaches the prevalent issues in ecology from an aesthetic viewpoint stressing the beauty and balance of nature.

A Sand County Almanac, 1970. Since his death in 1948, Aldo Leopold has been increasingly recognized as one of the indispensable figures of American environmentalism. A pioneering forester, sportsman, wildlife manager, and ecologist, he was also a gifted writer whose far-sighted land ethic is proving increasingly relevant in our own time. Now, Leopold's essential contributions to our literature are gathered in a single volume for the first time. Here is his classic A Sand County Almanac hailed with Thoreau's Walden and Carson's Silent Spring as one of the main literary influences on the modern environmental movement published in 1949. It is still astonishing today a vivid firsthand philosophical tour de force along with Sand County are more than fifty articles, essays, and lectures exploring the new complexities of ecological science and what we would now call environmental ethics. Leopold's sharp-eyed, often humorous journals are illustrated here for the first time with his original photographs, drawings, and maps. Also unique to this collection is a selection of over 100 letters most of them never before published tracing his personal and professional evolution and his efforts to foster in others the...
love and sense of responsibility he felt for the land

Science and Stewardship to Protect and Sustain Wilderness Values  2003  Natural resource policies provide the foundation for sustainable resource use management and protection. Natural resource policy blends policy processes, history, institutions, and current events to analyze sustainable development of natural resources. The book's detailed coverage explores the market and political allocation and management of natural resources for human benefits as well as their contributions for environmental services. Wise natural resource policies that promote sustainable development not senseless exploitation promise to improve our quality of life and the environment. Public or private policies may be used to manage natural resources when private markets are inadequate due to public goods or market failure. Many policy options, including regulations, education, incentives, government ownership, and hybrid public-private policy instruments, may be crafted by policy makers whether a policy is intended to promote intensive management of natural resources to enhance sustained yield or to restore degraded conditions to a more socially desirable state. This comprehensive guide outlines the ways in which natural resource managers can use their technical skills within existing administrative and legal frameworks to implement or influence policy.

Park Science 1994  A household icon of the environmental movement, Aldo Leopold (1887-1948) may be the most quoted conservationist in history. A Sand County Almanac has sold millions of copies, and his lyrical writings are venerated for their perceptions about land and how people might live in concert with the whole community of life. Using a fresh study of Leopold's unpublished archival materials, Julianne Lutz Newton retraces the intellectual journey that generated such passion and intelligence.

The Fall of the Wild 2018-12-11  The identification and analysis of the particular habitat needs of a species has always been a central focus of research and applied conservation in both ecology and wildlife biology. Although these two academic communities have developed quite separately over many years, there is now real value in attempting to unify them to allow better communication and awareness by practitioners and students from each discipline. Despite the recent dramatic increase in the types of quantitative methods for conducting habitat analyses, there is no single reference that simultaneously explains and compares all these new techniques. This accessible textbook provides the first concise authoritative resource that clearly presents these emerging methods together and demonstrates how they can be applied to data using statistical methodology. While putting the decades-old pursuit of analyzing habitat into historical context, habitat ecology and analysis is written for senior undergraduate and graduate students taking courses in wildlife ecology, conservation biology, and habitat ecology as well as professional ecologists, wildlife biologists, conservation biologists, and land managers requiring an accessible overview of the latest methodology.

Leopold's Shack and Ricketts's Lab 2010  In this work, ecologists, wildlife biologists, and other conservationists explore the ecological legacy of Aldo Leopold and his contributions to the environmental movement. The philosophy of science and natural resource management.

The Malthusian Moment 2012-05-07  Our technological culture has an extremely dynamic character: old ways of reproducing ourselves, managing nature, and keeping animals are continually replaced by new ones. Norms and values with respect to our bodies, food production, health care, and environmental protection are regularly being put up for discussion. This constantly confronts us with new moral problems and dilemmas. In discussion with other approaches, this book argues that pragmatism, with its strong emphasis on the interaction between technology and values, gives us both procedural help and stresses the importance of living and cooperating together in tackling these problems and dilemmas.
the issues in this book include the interaction of technology and ethics the status of pragmatism the concept of practice and discourse ethics and deliberative democracy it has an interactive design with original contributions alternating with critical comments the book is of interest for students scholars and policymakers in the fields of bioethics animal ethics environmental ethics pragmatist philosophy and science and technology studies
