The Oxford Handbook of International Antitrust Economics has collected chapters from many of the leading figures in antitrust in doing so. This two-volume handbook provides an important reference guide for scholars, teachers, and practitioners. However, it is more than a merely reference guide. Rather, it has a number of different goals. First, it takes stock of the current state of scholarship across a number of different antitrust topics. In doing so, it relies primarily upon the economics scholarship. In some situations, though, there is also coverage of legal scholarship, case law developments, and legal policies. The second goal of the handbook is to provide some ideas about future directions of antitrust scholarship and policy. Antitrust economics has evolved over the last 60 years; it has both shaped policy and been shaped by policy. The Oxford Handbook of International Antitrust Economics will serve as a policy and research guide of next steps to consider when shaping the future of the field of antitrust.

this valuable reference presents the going royalty rate for virtually any product including over 1,500 products and services in ten lucrative categories: art, celebrity, character, entertainment, collegiate, corporate, designer, event, sports, nonprofit, and music. The essential reference for both beginning and more experienced licensing professionals, knowing the going royalty rate for virtually any product is as simple as reaching for the newly published licensing royalty rates 2020 edition. Setting a royalty rate too high can scare away potential licensees while accepting a lower rate can cost licensors hundreds of thousands of dollars. Licensing royalty rates 2020 edition provides all the information you need to calculate the right rate every time. The data in licensing royalty rates is compiled using information from the U.S. Patent and Trademark Office after careful review by a blue ribbon panel of expert licensing consultants uniquely qualified to know what the appropriate rate range is for specific properties in each licensing category. The information is organized into four time-saving sections that give researchers fast access to comprehensive statistical and analytical data. Royalty rate listing alphabetically by licensed product provides a detailed alphabetical listing of products and their suggested rate range across all product categories. Royalty rate listing by international trademark class lets you quickly identify subtle royalty rate differences between similar products within specific international trademark classes. Checklist of licensed products and services offers a quick reference to products with a high potential for licensing. Comprehensive list of licensed products and services presents a detailed list of all surveyed products and services within a trademark class for preparing intent to use trademark applications. This detailed information gives both beginning and more experienced licensing professionals the confidence needed to negotiate the maximum allowable rate regardless of the product, the market, and the parameters of the specific deal itself. não é novidade que a atividade empresarial tende a se desenvolver progressivamente de forma cada vez mais dinâmica. Empresas e empresários veem se obrigados a inventar e reinventar não só produtos como também novos modelos e estratégias de negócio. As políticas comerciais desempenham um papel importante na modelagem e na estruturação das empresas. Tal protagonismo é tamanho que em diversos casos o sucesso de determinada prática comercial é decisivo para o resultado financeiro positivo ou negativo dos agentes de mercado. Muitas dessas práticas comerciais têm nos descontos condicionados ferramentas para impulsionar o escoamento de produtos, trazer maior segurança na administração dos negócios e alavancar a conquista e a manutenção da participação de mercado. Nesse cenário é essencial para as empresas, especialmente aquelas que detêm posição dominante, atentarem-se à possibilidade de suas políticas de descontos condicionados produzirem efeitos anticompetitivos passíveis de sanção pelo Conselho Administrativo de Defesa Econômica (CADE), refletir sobre a potencialidade lesiva dos descontos condicionados. É ainda mais relevante tendo em vista o declarado ímpeto do CADE de dedicar mais tempo à normatização e à investigação mais detalhada de casos envolvendo condutas unilaterais como o caso dos descontos condicionados.
