had been available to me when I was studying to become a paramedic from the foreword by Professor Malcolm Woollard, Chair, College of Paramedics, Professor in Pre Hospital and Emergency Care, Director Pre Hospital Emergency Cardiovascular Care Applied Research Group, Coventry University. The objective is to encourage teachers and researchers to advance reflection among students and teachers in mathematics classrooms. Published jointly with the Association of Mathematics Educators in Singapore. This fifth volume in the series of Yearbooks by the Association of Mathematics Educators in Singapore entitled Nurturing Reflective Learners in Mathematics is unique in that it focuses on a single theme in mathematics education. The objective is to encourage teachers and researchers to advance reflection among students and teachers in mathematics classrooms. Several renowned international and Singapore researchers in the field have published their work in this volume.
the fifteen chapters of the book illustrate evidence based practices that school teachers and researchers can experiment with in their own classrooms to bring about meaningful learning outcomes three broad themes namely fundamentals instructional tools and approaches to teaching for nurturing reflective learners in mathematics classrooms shape the ideas in these chapters the book makes a significant contribution towards the learning of mathematics it is a good resource for mathematics teachers educators and research students high risk offenders can have a disproportionate impact on their communities because despite all manner of sentencing options they continue to commit a wide range of crimes both minor and serious it is tempting to throw the book at them sometimes even to throw away the key however anything that helps offenders to change their propensity for re offending can really make a difference over the last 30 years scientific research has guided the provision of treatment rehabilitation and reintegration services that lead to reductions in re offending much of what we know however comes from work with medium risk offenders although this work is important and valuable there is a lower level of complexity to working with medium risk offenders than most high risk
offenders require this book recognizes the need to research and develop different approaches to Rehabilitating high risk offenders each of the contributions takes a different approach with a different group of offenders in a different setting cumulatively the chapters provide encouragement for those working with high risk offenders along with a wide range of ideas about how to develop better services. This book was originally published as a special issue of psychology crime law curriculum leadership by middle leaders focuses on major issues relating to the continuing national and international discourse on curriculum leadership and highlights the vital role of middle leaders in schools. School leadership has focused primarily on first order change involving school leaders or principals. This book seeks to put the spotlight on second order change that involves curriculum leadership and professional development support on the part of middle leaders for more sustainable and long term change in teaching and learning that will influence what happens in classrooms with timely and thought provoking contribution from authors who pursue a range of scholarly interests in multiple educational settings. The book is guided by several underlying questions: how might we re-envision curriculum leadership so that
it addresses both local and global concerns and aspirations how might we better grasp how middle leaders understand and respond to the pressures of educational reform initiatives how might middle leaders transform pressures into possibilities this book will appeal to current teachers those currently undertaking teacher training and students or academics carrying out research in the field of educational leadership this volume is full of ideas for solving common technical problems and creates a framework for band directors to re evaluate and improve every aspect of the job from publisher description this revised and updated sixth edition of reference and information services continues the book's rich tradition covering all phases of reference and information services with less emphasis on print and more emphasis on strategies and scenarios reference and information services is the go to textbook for mslis and i school courses on reference services and related topics it is also a helpful handbook for practitioners authors include lis faculty and professionals who have relevant degrees in their areas and who have published extensively on their topics the first half of the book provides an overview of reference services and techniques for service provision including the reference interview
ethics instruction reader's advisory and services to diverse populations including children this part of the book establishes a foundation of knowledge on reference service and frames each topic with ethical and social justice perspectives the second part of the book offers an overview of the information life cycle and dissemination of information followed by an in depth examination of information sources by type including dictionaries encyclopedias indexes and abstracts as well as by broad subject areas including government statistics and data health and legal information this second section introduces the tools and resources that reference professionals use to provide the services described in the first half of the text in recent years china has witnessed unprecedented economic growth emerging as a powerful influential player on the global stage now more than ever there is a great interest and need within the west to better understand the psychological and social processes that characterize the chinese people the oxford handbook of chinese psychology is the first book of its kind a comprehensive and commanding review of chinese psychology covering areas of human functioning with unparalleled sophistication and complexity in 42 chapters leading authorities cite and
