Tep Vol 16-N1 1990 recent discussions among scientists and policy makers have highlighted that knowledge generated by many research and demonstration projects is not reaching policymakers in an efficient way conversely the consideration of research results by the policy making community is not straightforward and difficulties arise in integrating the latest research developments in legislation the difficulty is enhanced by the fact that the policy making community is not defining its role as client sufficiently well and the dialogue and communication channels are far from ideal to ensure an efficient flow of information an increasing number of experts consider that improvements could be achieved through the development of a science policy interface so that results are synthesised in a way to efficiently feed policy implementation and that short medium and long term research needs may be identified this book examines the issue of integrating science into policy with an emphasis on water system knowledge and related policies an important feature of the book is the discussion of science policy interfacing needs illustrated by examples from authors from different countries in relation to water system management this publication is timely in that the science policy interfacing is now identified as a key challenge worldwide with regard to integrated water resource management and therefore the book will be of great interest to scientists water managers and stakeholders readers will also benefit from a better understanding of the needs benefits and drawbacks of an established transfer mechanism of scientific outputs to policies
