Fire and Rescue Service Manual 2007-03-07

Incidents involving rescue from road vehicles are dramatically increasing in frequency. There are some 3 500 deaths on the road each year with 50 000 serious injuries.

Modern motor vehicles are becoming safer for occupants due to advancement in technology, 50 persons are more likely to survive high impact speeds but are also more likely to become entraped.

The Fire and Rescue Service requires national guidance to ensure a similar standard of response anywhere in the UK. This manual is designed to highlight current best practice and guide to this rescue techniques and first responder trauma care. Each chapter forms an independent reference source but the publication as a whole forms a complete guide.

This book is a comprehensive guide to rescue tool handling and extrication techniques.

The book provides comprehensive guidance on the development, design and application of rescue systems and standards for the rescue of casualties from vehicles.

It is an essential reference for all who work in the field of vehicle rescue and is a valuable resource for those who need to ensure that the best practice is adopted in any vehicle related rescue operation.

This book contains the entire collection of high quality full papers and technical notes from Ubicomp 2003. There were 16 full papers in this year's conference selected by our international program committee from among 117 submissions.

Ubicomp 2003 focuses on the sign implementation deployment and evaluation of ubiquitous computing technologies and the conference brings together leading researchers from a variety of disciplines.

Ubicomp 2003 is a multi-media guide to rescue tool handling and extrication techniques.

It is a union list of serials commencing publication after Dec. 31, 1949.
